

Lift Fan: Papst Multifan 4312M (120 mm x 120 mm), dismount fan and drill the plastic rivets, the fan just came.
 Motor Graupner Speed 600 Eco 8.4 V

Thrust motor : Speed 500 7.2 V reduced 4.5/1
 It will be more economical and preferable for having a right turning propeller to use a reversing gear reduction (boat reducer). Also that's slightly low the center of gravity.
 Propeller diam 12" x 6/8" if reduction 5/1 or 12" x 4.5" if reduction 3.8/1 (Left turn if your shaft turn in same direction as motor).

Wires to open flaps
 Fil pour ouvrir les volets

Flap : must be ballasted
 Voilet : doit être ballasté
